

# Global Gateway API

The First Data Global Gateway API allows you to build and manage customized e-commerce capabilities for virtually any Web site. It is best suited for merchants with programming expertise and resources.

## Challenge

Many retailers are already using e-commerce on their Web site, but they want a solution that's more flexible, one that they can tailor fit to their environment and fully integrate with their Web site and existing shopping cart application.

## Solution

The Global Gateway API provides the comprehensive programming tools required to integrate payments into a custom Web site or other commerce application. Our solution can enable multiple payment options, fraud protection tools, recurring payments and leverages Secure Sockets Layer (SSL) security. The Global Gateway API is also able to accommodate many standard programming languages.

## How It Works

Our Global Gateway API allows you to seamlessly integrate payment functionality into virtually any Web site or custom built application. Simply choose your preferred programming language and the payment functionality required for your business needs.

## Features

- Supports all major card types
- Alternative payments including PayPal and Google Checkout
- Verified by Visa and MasterCard SecureCode fraud prevention services
- Accommodate shipping and tax information
- Level II card support for business-to-business transactions
- Recurring payments functionality for subscriptions and installments
- Easy integration with almost any commerce system, order management or accounting software
- Compatibility with multiple programming languages
- User access controls
- Extensive, real-time reports
- 128-bit secure sockets layer (SSL) security
- Fraud protection tools and prevention measures

# Global Gateway API
